

INTERNSHIP REPORT

ZUBU INFOTECH PVT.LTD

SUBMITTED BY

MISS. LATHIKA GANESH ADHINI(8002)

TYBCA 'A'

DURATION

09 JUNE 2026 – 10 AUGUST 2026

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to Zubu Infotech Pvt. Ltd. for providing me with the opportunity to undertake this internship and gain valuable practical experience in the field of web development.

I am thankful to the management and my mentors at Zubu Infotech Pvt. Ltd. for their guidance, support, and encouragement throughout the internship. Their valuable suggestions and feedback helped me understand the practical aspects of software development and improve my technical skills.

During this internship, I had the opportunity to work on the Meera – Online Jewellery E-Commerce Platform, where I contributed to the development of the Checkout Page and its major components, including customer details, address selection, delivery options, order summary, coupon handling, payment methods, price calculation, validation, and order placement. This experience helped me apply my technical knowledge to a real-world e-commerce application and understand the importance of a smooth and user-friendly checkout process.

I am also grateful to everyone who supported and guided me throughout the internship. The knowledge, skills, and experience gained during this period will be valuable for my future academic and professional development.

I sincerely thank Zubu Infotech Pvt. Ltd. for providing me with this valuable learning opportunity.

COMPANY DETAILS

Zubu Infotech Pvt. Ltd.

Zubu Infotech Pvt. Ltd. is a technology and software development company providing digital solutions and web development services. The internship provided an opportunity to gain practical exposure to real-world software development and understand the development process used for modern web applications.

During the internship, I worked on the Meera – Online Jewellery E-Commerce Platform, where I contributed to the development and enhancement of the Checkout Page and its related components to provide a clear, responsive, and reliable purchase experience.

• TASKS DURING INTERNSHIP

Task 1 – Zubu Infotech Website Prototype

Purpose: The first task was assigned to evaluate our technical, design, and development skills.

Work completed:

- Developed the Zubu Infotech website using React.
- Created a responsive navigation bar and multiple website sections.
- Designed the hero section and company introduction.
- Added AI, Web, Mobile, Enterprise Software, and Data & Analytics capability sections.
- Created the Selected Work/Projects section.
- Developed a separate contact page with enquiry form, FAQ, and contact information.
- Implemented interactive Three.js 3D orb and particle animations.
- Added interactive buttons, scrolling, hover effects, form submission, and FAQ expansion.
- Used React state and effects for page navigation and interactions.

Task 2 – Research and Documentation for the Final Project

- Researched the requirements and concept of the new/final project.
- Discussed the project scope and functionality.
- Prepared the required software documentation:

- **SRS – Software Requirements Specification**
- **SDD – Software Design Document**
- **UML Documentation**
- **Test Cases**
- Participated in discussions regarding the final project.
- After the project discussion, the overall work was **distributed among 7 team members** according to the project requirements and responsibilities.

Task 3- Checkout Page Components

As part of the internship, I worked on the Checkout Page of the Meera Online Jewellery E-Commerce Platform. The main objective of this task was to organize all important checkout components in a simple and user-friendly flow so that customers could review their purchase details and complete an order easily.

The Checkout Page was developed with components for customer contact information, billing and shipping address, delivery method, product and quantity details, order summary, subtotal, discounts, taxes, shipping charges, and final payable amount. These components were arranged to provide clear information and reduce confusion during the purchase process.

The payment section was designed to provide available payment methods, while validation and error handling helped identify incomplete or incorrect information before the order could be placed.

The final checkout flow included order review and a Place Order action. Responsive design was considered so that the checkout components could work properly across different screen sizes. Overall, the components were developed to provide a consistent, accessible, and smooth checkout experience.

IDE: Visual Studio Code

Technologies Used: React, TypeScript, Tailwind CSS

Skills Learned and Experience

During the internship, I gained practical experience in software development, documentation, communication, and teamwork.

1. Technical Skills

- Gained practical experience in **React and web development**.
- Worked with interactive UI components and **Three.js**.
- Learned about **checkout page components** and their functionality.

2. Documentation Skills

- Learned to prepare **SRS, SDD, UML diagrams, and Test Cases**.
- Understood the importance of documentation during project planning and development.

3. Communication and Teamwork

- Participated in **weekly video meetings** to discuss progress and receive feedback.
- Improved communication, presentation, and teamwork skills while working with a **7-member team**.

4. Professional Experience

- Learned how to research project requirements and understand project scope.
- Gained experience in project discussions, task distribution, development, and testing.
- Improved problem-solving, time management, and ability to work according to requirements.

INTERNSHIP LOG TIME

Date	Hours Worked	Total Hours Worked to Date	Activity
09/06/26 to 16/06/26	3+3+3+3+3+2 = 17 hrs	09/06/26 to 16/06/26 (17 hrs)	Training: Learned about the internship workflow, software development process, development tools, project planning, professional communication, teamwork, task management and project responsibilities.
17/06/26 to 18/06/26	3+3 = 6 hrs	17/06/26 to 18/06/26 (6 hrs)	Task 1 – Zubu Infotech Website Prototype: Developed the Zubu Infotech website using React, created responsive navigation and website sections, worked on interactive elements, contact page, FAQ and implemented Three.js-based 3D visual effects.
19/06/26 to 10/07/26	2+3+3+3+3+3+3+3+3+3+3+2+2+2+2+1 = 43 hrs	19/06/26 to 10/07/26 (43 hrs)	Task 2 – Research & Documentation: Researched the final project, studied requirements and project scope, discussed system functionality, prepared SRS and SDD documents, created UML documentation and test cases, participated in project discussions, and helped distribute the work among 7 team members.

Date	Hours Worked	Total Hours Worked to Date	Activity
13/07/26 to 24/07/26	3+3+3+3+3+3+2+2+2+2 = 26 hrs	13/07/26 to 24/07/26 (26 hrs)	Task 3 – Checkout Page Components: Studied the checkout flow and developed components for customer information, billing and shipping address, delivery method, product details, order summary, discounts, taxes, shipping charges, payment methods, validation, responsive design and the final Place Order flow.
27/07/26 to 10/08/26	3+3+3+3+3+3+3+2+2+1+2 = 28 hrs	27/07/26 to 10/08/26 (28 hrs)	Testing, Debugging & Finalizing: Tested checkout functionality, order summary, discounts, payment and validation, identified and fixed errors, performed responsive testing, improved components, completed final validation, reviewed documentation and finalized the project.
	TOTAL = 120 HRS	120 Hours

CONCLUSION

In conclusion, my internship at Zubu Infotech Pvt. Ltd. provided me with valuable practical experience in the field of web development and helped me understand the application of technical concepts in a real-world project environment.

During the internship, I had the opportunity to contribute to the Meera – Online Jewellery E-Commerce Platform, particularly in developing and improving the Checkout Page and its major components. I worked on customer and address details, delivery options, order summary, discounts and coupons, price calculations, payment methods, validation, and the final order-placement flow.

This experience helped me strengthen my knowledge of React, TypeScript, Tailwind CSS, component development, state management, form handling, validation, responsive UI development, and user interaction handling. It also improved my problem-solving skills and understanding of developing clear and user-friendly e-commerce checkout interfaces.

Overall, the internship was a valuable learning experience that enhanced my technical skills, practical knowledge, and confidence in working on real-world web development projects. The knowledge and experience gained during this period will be beneficial for my future academic and professional growth.
